Why are EVO Suites so Advanced & Sustainable ?

Built for deconconstruciton, not demolition

Prefabricated & Modular buildings all but eliminate waste generated from demolition. Modular building systems are a prime example of recycle, repurpose and reuse.

EVO Units are Factory prefabrication, allowing **10 -15 day** on-site assembly with very low environmental impact, **elementing construction noise, dust,** and building materials discarded on project site. Most importantly most components are recyclable.

Just a few of the key standard features you will find with EVO Suites:

*Solar Roof Top Water Heater included with **Offgrid Suites**

- Smart Air Flow Building Design (Limit AC Usage)

- V-KOOL Smart window cooling & HÜPER OPTIK , to reduce AC power consumption during peak sunlight hours.

- EVO specially chosen smart low wattage use electrical appliances like LG Dual Cool Eco Inverter AC units. 70 Percent more efficient and 40 percent more cooler with variable watt control. Minimum noise pollution for compressor and interior unit. Built in air purifier

- REC Solar roof mount panels installed on each unit. *(Hybrid Design) Europe's most advance solar company

DESIGN

Evo 4 designed by an Australian master in architectural art, under the theme of seclusion. Rural life can create beauty, and people are an indispensable part of rural beauty and nature. By means of structure, space combination and decor, we present the abstract physical beauty between buildings

The combination of geometric spaces, which are full of modernist art sense, not only supports each other, but also integrates harmoniously.

MORE NATURAL & ARTISTIC

Evo 4 fully demonstrates the beauty of the villa's wooden look by integrating with the artistic features of modern architecture.

The modern & sleek exterior delivers a sense of modest luxury to experience.

Precision - Sustainable - Anywhere

MORE NATURAL AND ARTISTIC

The floor to ceiling French windows in the living room and bedroom, let you see the charm of all seasons right before your eyes.
evo 4's double-pane glass provides energy savings in both hot & cold climates

Precision - Sustainable - Anywhere

Off-grid living made easy.

*Off-grid power solar storage power pack available in all evo models.

ISOLATION & SECLUSION

Outside "The Villa" are green fields. You can see through the living room loocking in.

Enjoy a weekend, enjoy a week or a month or two. evo 4 is longterm gridtied or off-grid built ready.

M12-30

## SAFER & MORE ENVIRONMENTALLY FRIENDLY

The frame & support structure is made of aero metal alloy, which is more stable against wind and earthquakes.

The walls are made of specialized termite resistant wood and aluminum plates, so as to avoid insect ant erosion problems in remote areas. Compared to traditional cabins, villas and homes.
